## ABOUT US //

Our Founding Chairman Huseyin Taspatlatan, with 30 years of extensive knowledge and experience, is known for his innovative approach in the industrial world, specialising in the “store equipment” industry.

End systems is your European Partner providing “Special Solutions” for the “Retail World” following a strategy for ‘sooner delivery, higher quality and more economical products’...

As a company policy, our preference in recognition, is to operate with a “Lean System”, the company has transferred its product range into a boutique structure. End System continues its trade by pursuing the target of being “Number One” in the field of TURNSTILE SYSTEMS.

Also with the our flexible production lines, we also realize higher quality and more economical productions for your company, ‘Automotive-Hardware-Boutique-Living Areas’, taking into account your demands.

## OUR MISSION

Turnstile systems, stores, markets, living spaces and automotive world for the special production requests of the companies; higher quality, more aesthetic and more practical products; to offer more economical solutions just in time.

## OUR VISION

To be the “Number 1” in the world with ergonomic designs and applications that suit our people in every point of their living spaces and retail world.

## QUALITY POLICY

According to the vision of END SYSTEM, our quality policy aims to develop highly secure products which duly satisfy the expectations of our customers bearing in mind the technological change.

## OUR ROAD MAP and VALUES

- Our Lean System preference is based on the continuous improvement in every phase of our production flow systems.
- “Higher-quality product” guides our team to reach their targets.
- By emphasising on continuous improvement, enables us to compete internationally.
- Innovative approach together with discipline is of our most important value.
- Being honest in terms of the goods we produce and services we provide, is a core value for each and every employee of our company.
- We continue working with our environmentalist discipline to set an example in the industry.
